Subject: FW: Request for Sub-Group Volunteers.

Hi Phil,

Are any of you guys interested in participating in any of these subgroups. Right now, the group of people I have are Kurt, Steve, Tom K (WY), and myself. Steve and I are interested in items 1 and 4. Tom said he was interested in 3 and 4. Kurt did not give a preference.

Thanks

Subject: Request for Sub-Group Volunteers.

Hey Bill!

Request for Sub-Group Volunteers...

The State Oil & Gas Regulatory Exchange – Induced Seismicity Workgroup met recently by teleconference and among other things decided to develop FOUR specific subject sub-groups.

The smaller groups will work with volunteer advisors and provide feedback to the full group. The following subgroups were established including:

1. Review of the traffic light decision approach – **Tim Baker** (OK), lead
2. Review of the concept surface motion (or ground movement) rather than (or in addition to) magnitude as a measurement that would lead to more appropriate communication to the public as well a more appropriate measurement for decisions – **Herschel McDivitt** (IN), lead
3. Review of the concept of establishing an information sharing data repository – **Rex Buchanan** (KS) and/or California to take the lead
4. Review of the issues regarding seismic monitoring – **Craig Pearson** (TX) lead

If you would like to volunteer to work with one or more of these four sup-groups, please let me know.

ALSO, please let us know if you know experts in these specific areas who we should consider inviting for their expertise.

THANKS!

Ben Grunewald
